Introduction

At Paragon Studio we strive for perfection. Our luxury gym equipment is handcrafted in the UK using premium, sustainable materials.

We have perfected the art of combining the ergonomics of exercise with unparalleled beauty, where form follows function throughout our design. A truly British innovation, our goal is to offer sustainable and customisable gym equipment to the world - taking a bespoke approach that ensures every product is unique to each client.

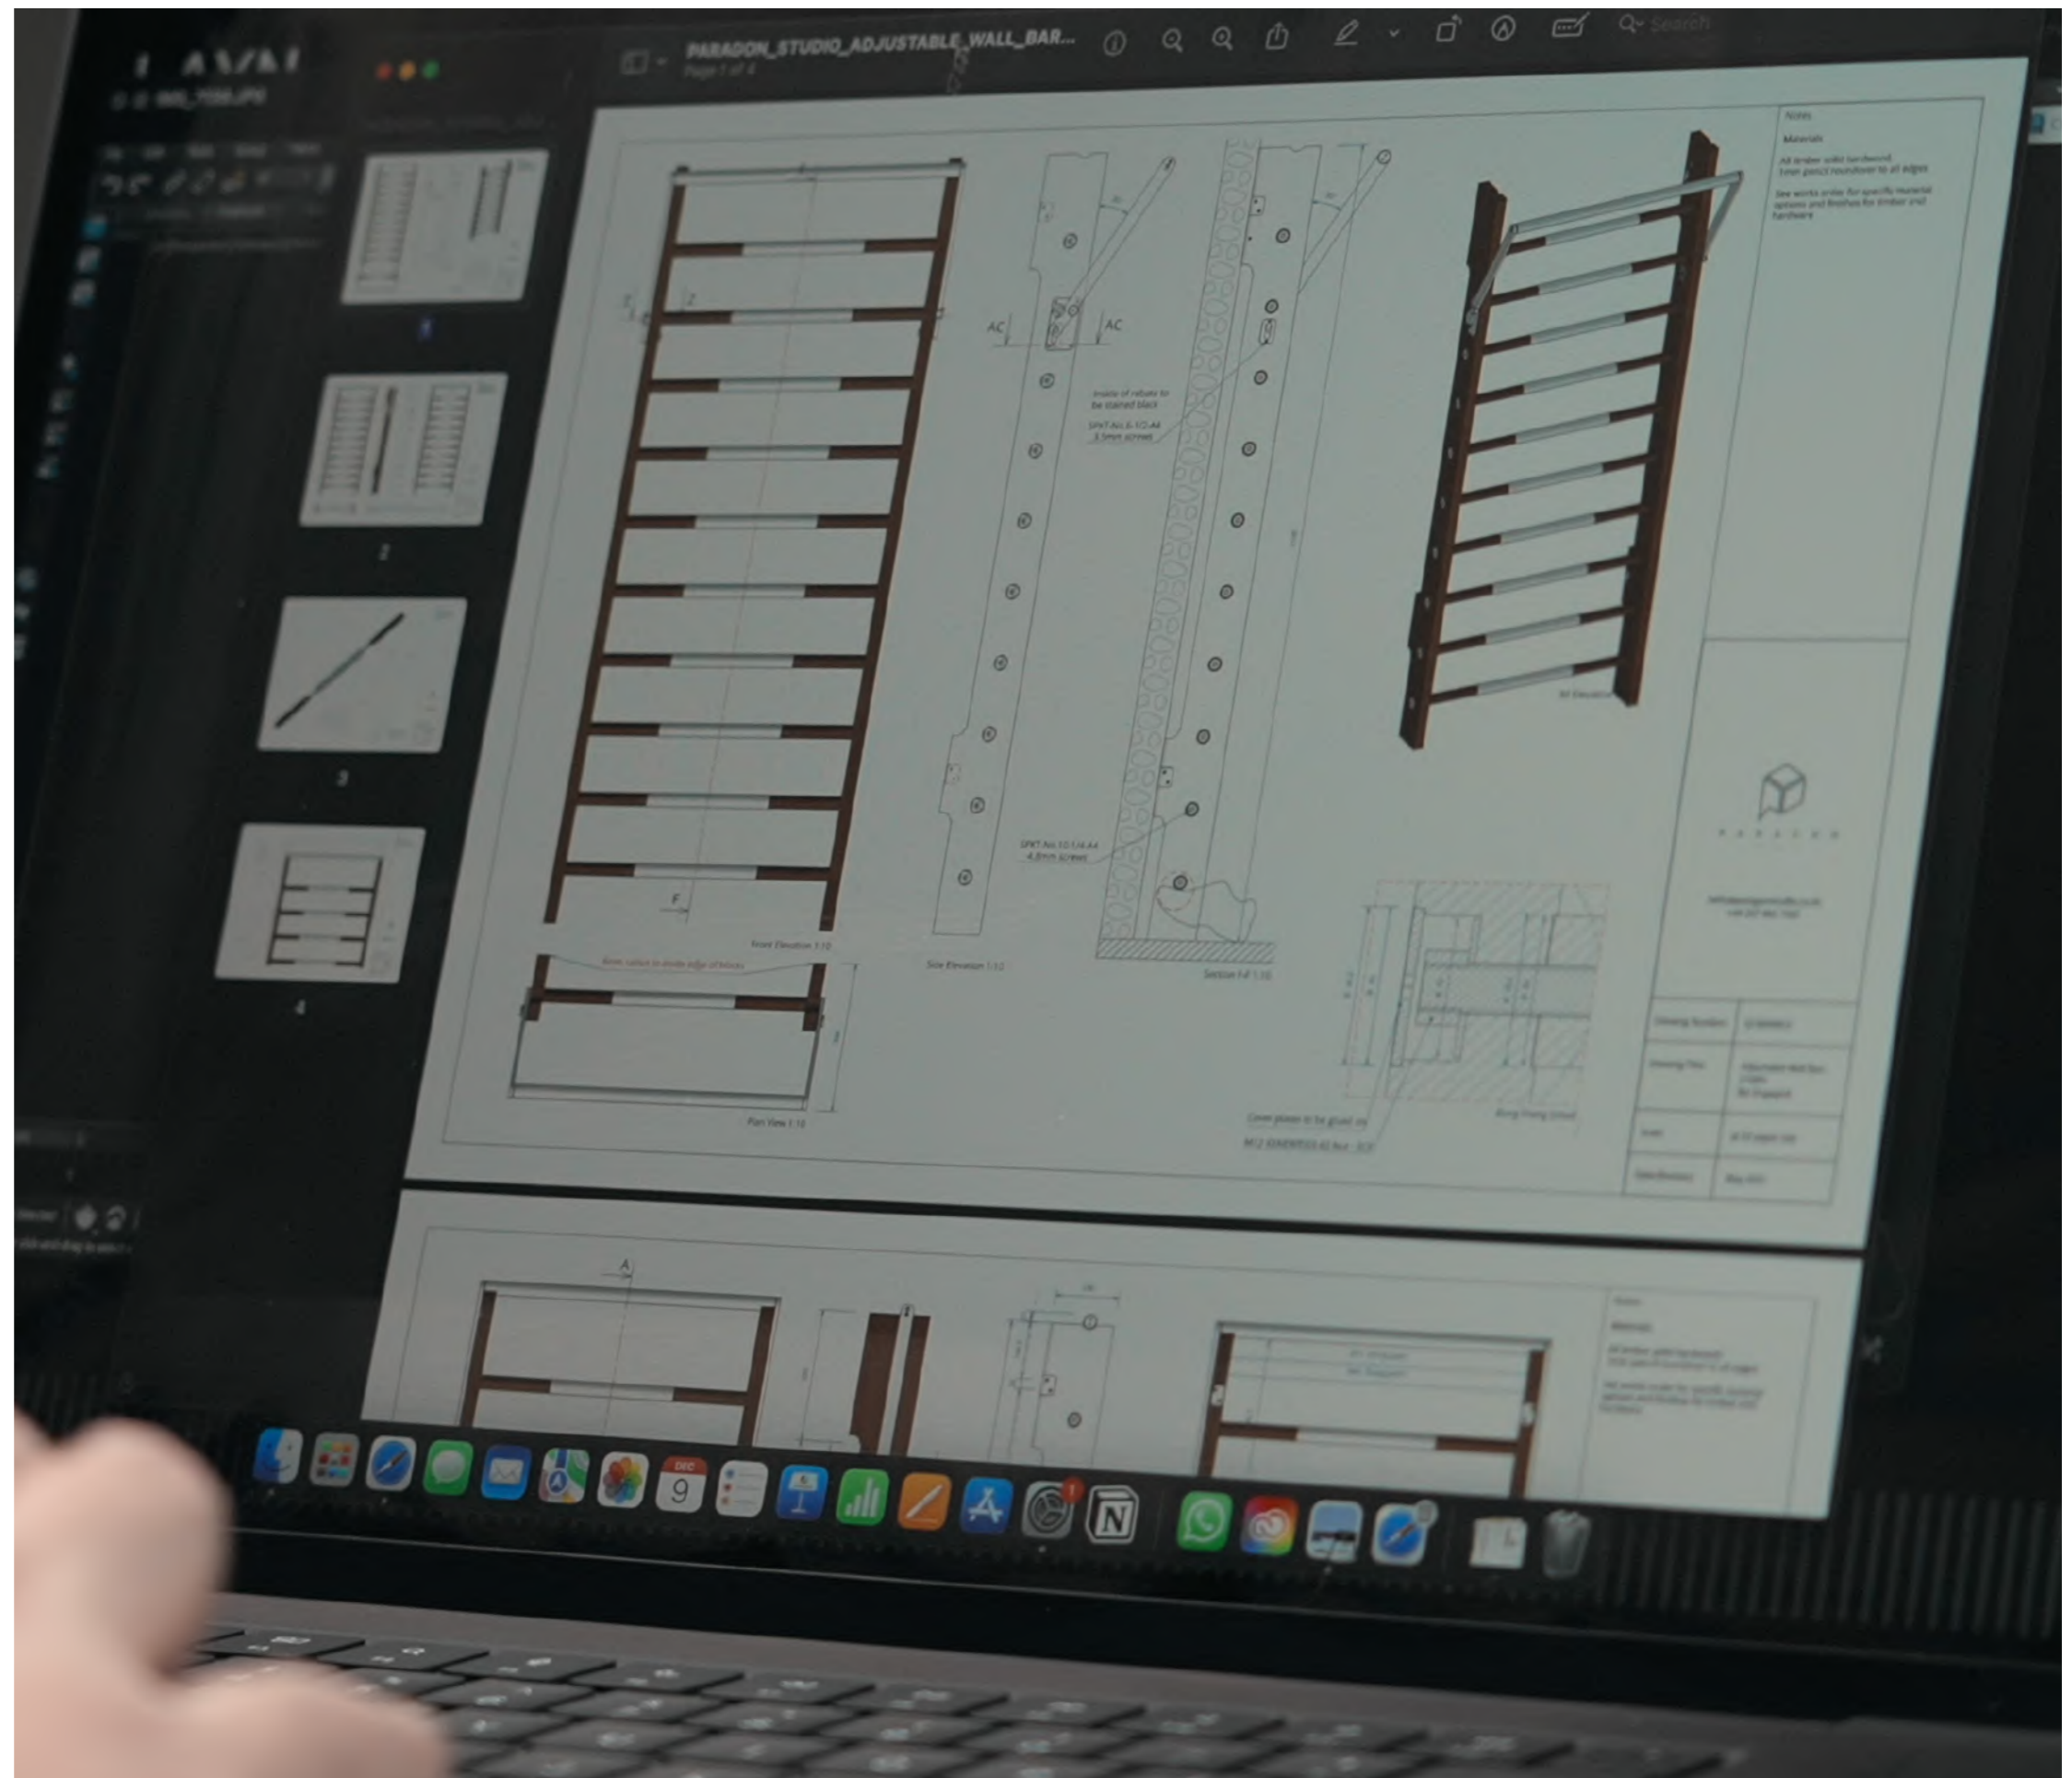

Our Design Process

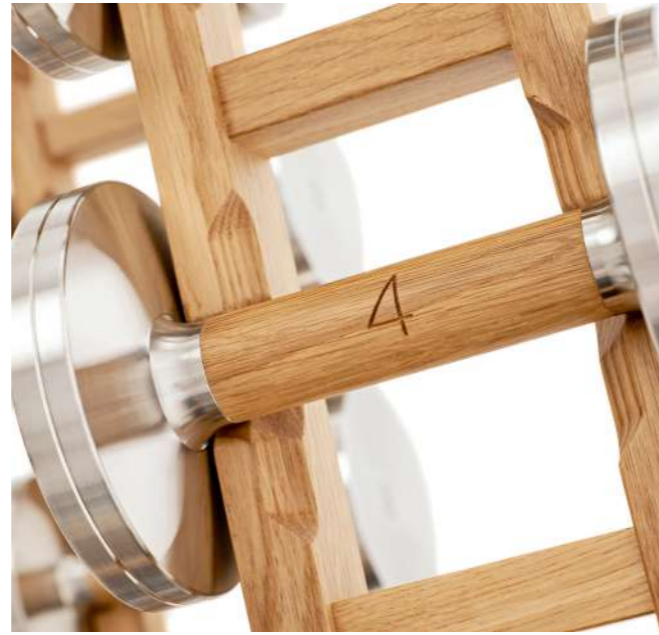

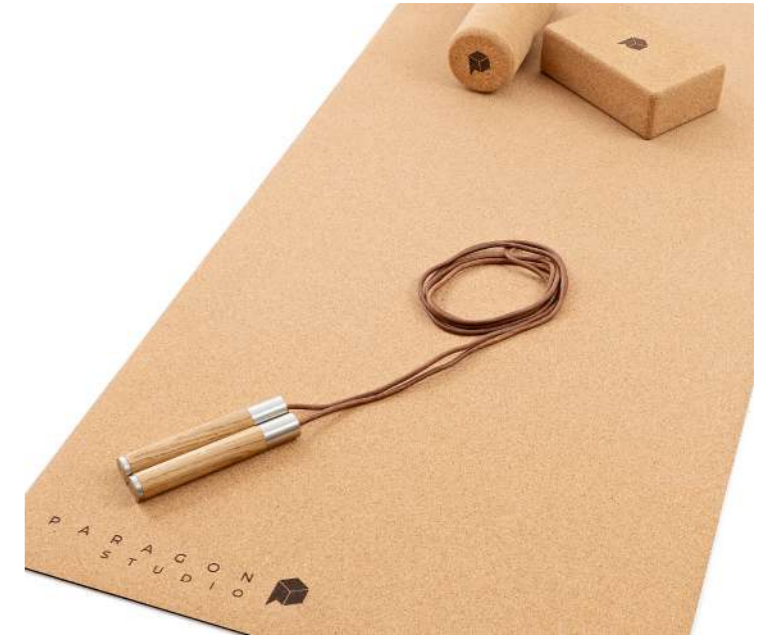

When we are working on developing new products for our range, our aim is to put function first and then design the form around it. This results in gym equipment that is more than just an ornament - each piece is made for tough workouts.

Once a product is ready to be prototyped, our engineers will begin to discuss how we can integrate sustainable materials and processes into the build in order to cut emissions.

Because each piece is made to order, our team are able to approach a project with a blank canvas and incorporate any bespoke requirements a client has during the pre-production phase.

This gives us unrivalled flexibility within our range, which is loved by clients and designers worldwide. As we continue to innovate and make unique changes to our products as requested by individual clients, we are continually learning new techniques and making improvements to our core product range.

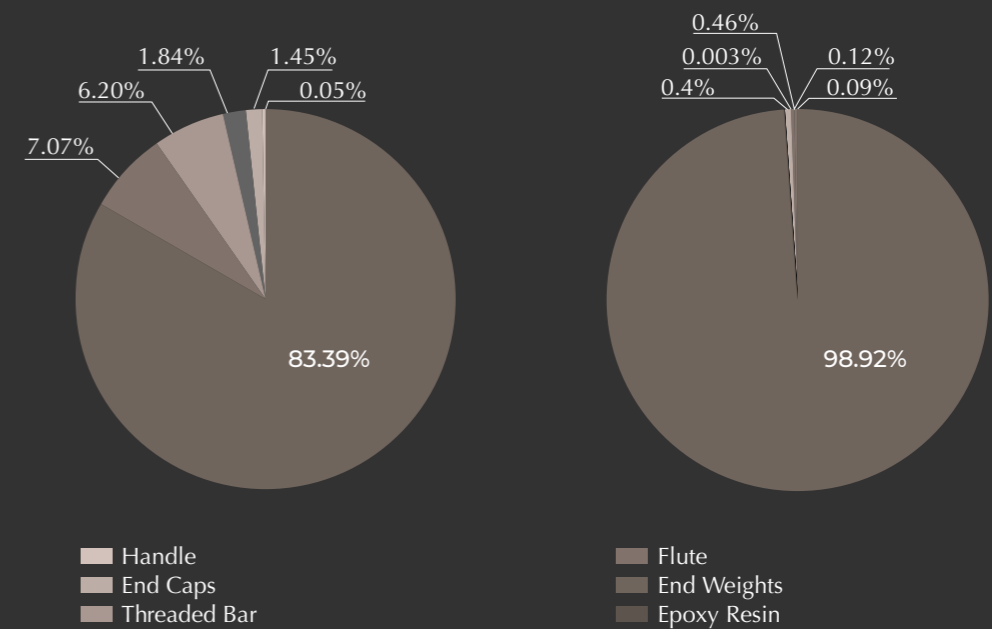

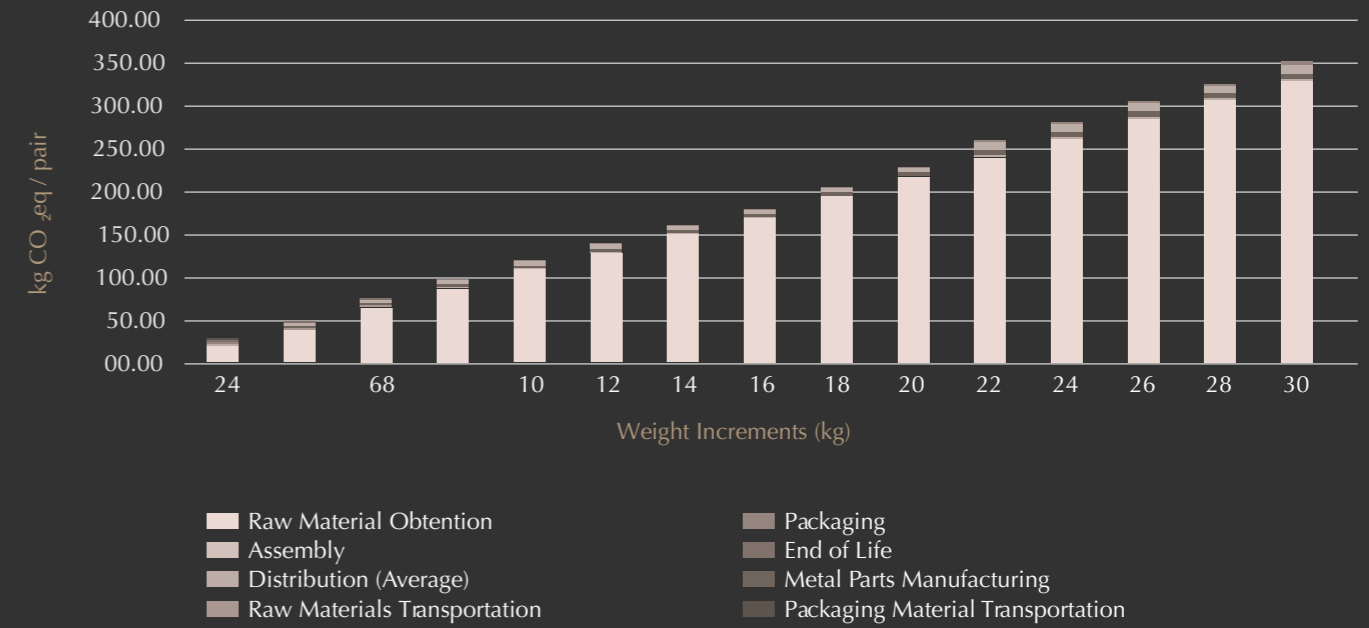

Route to Carbon Neutral

Our Diabolo Dumbbells are on the path to carbon negative. The inspiration behind our award-winning Diabolo Dumbbells was to produce a beautiful and high-quality dumbbell with sustainability at the forefront. While we know that our dumbbells are made from sustainably sourced materials and are 100% recyclable, we also wanted to be transparent about their environmental impact.

As such, we teamed up with an independent sustainability partner to commission a Carbon Footprint Report and establish the true environmental impact of our Diabolo Dumbbells. Carbon Managers has since carried out a thorough lifecycle assessment (LCA) study of all greenhouse gases and the converted CO₂ equivalents (CO₂e) associated with the manufacturing, packaging, distribution, use, and end of life, of the dumbbells.

Classic Range

Diabolo Dumbbells

Our award winning Diabolo Dumbbells are the result of years of experience in the superyacht and prime property industries.

A truly over-engineered design - these dumbbells offer unparalleled levels of customisation and a uniquely concave end design. Choose our sustainable wooden handles and customise with laser engraving to add a touch of bespoke to your gym.

Gym Rug

Introducing our exclusive performance Rug Collection, designed to bring sophistication, durability, and functionality to elite gym spaces.

Inspired by our clients, this product allows Interior Designers and homeowners to specify their preferred timber floors in their gym spaces – providing a seamless and customisable alternative for loose laid rubber floor tiles required to protect the wood in the freeweights area.

The collection features rugs crafted from Polypropylene (PP) yarn, known for its exceptional resilience and easy to maintain nature. Developed in a range of refined hues including brown, charcoal and blue and constructed in a high performance loop texture that adds elegance to any gym.

Rugs can be specified in any shape or size, and a 2mm non-slip layer is provided underneath for extra security. Our rugs are washable and can even be bleached.

Prices from **£700 p/m²**
(Ex VAT)

Yoga Accessories

Cork Yoga Mat

Made from sustainable materials, the Cork Yoga Mat offers unparalleled quality in recycled, sustainable and biodegradable materials. It is beautifully crafted with a natural rubber base, ensuring a non-slip and injury free experience during floor workouts.

Material Options

Material Options

At Paragon Studio, we offer clients bespoke equipment across our entire collection. Alongside our standard selection of materials, our range of products can be made in any wood or metal finish you can imagine.

We encourage clients and designers to suggest their own material finishes for each individual component of the equipment, carefully matching and sampling new techniques where necessary to improve the final product.

Woods

Oak

Elegant and classic, our European Oak is sourced from sustainable forests. The beautiful wood grain has a natural pattern, making each piece unique.

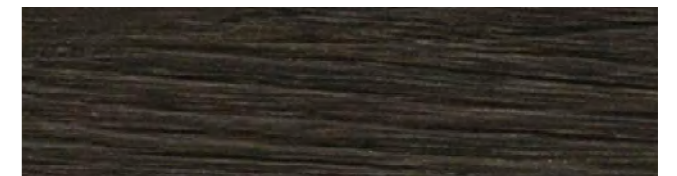

Iroko

A warm and rich wood, which is elegant and durable. We use Iroko in place of traditional Teak to ensure sustainable and ethical sourcing.

Walnut

Prized for its strength and durability, American Walnut has a velvety finish in its grain and a rich brown colour.

Blackwood

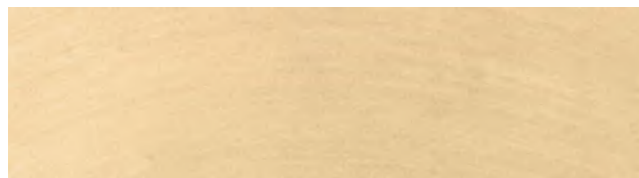

Deep black stained Oak which allows the natural wood grain to show through. Hand finished in the UK, this material holds its colour to stand the test of time.

Metals

Stainless Steel

Elegant and hardwearing, Steel offers a uniform and highly reflective finish which compliments all interiors. Turned or polished with an elegant shine.

Bronzed Steel

A popular gold hue that is delicate yet opulent. Eclectic warm tones will tie your gym design together. We use Aluminium bronze or PVD coating to achieve this look.

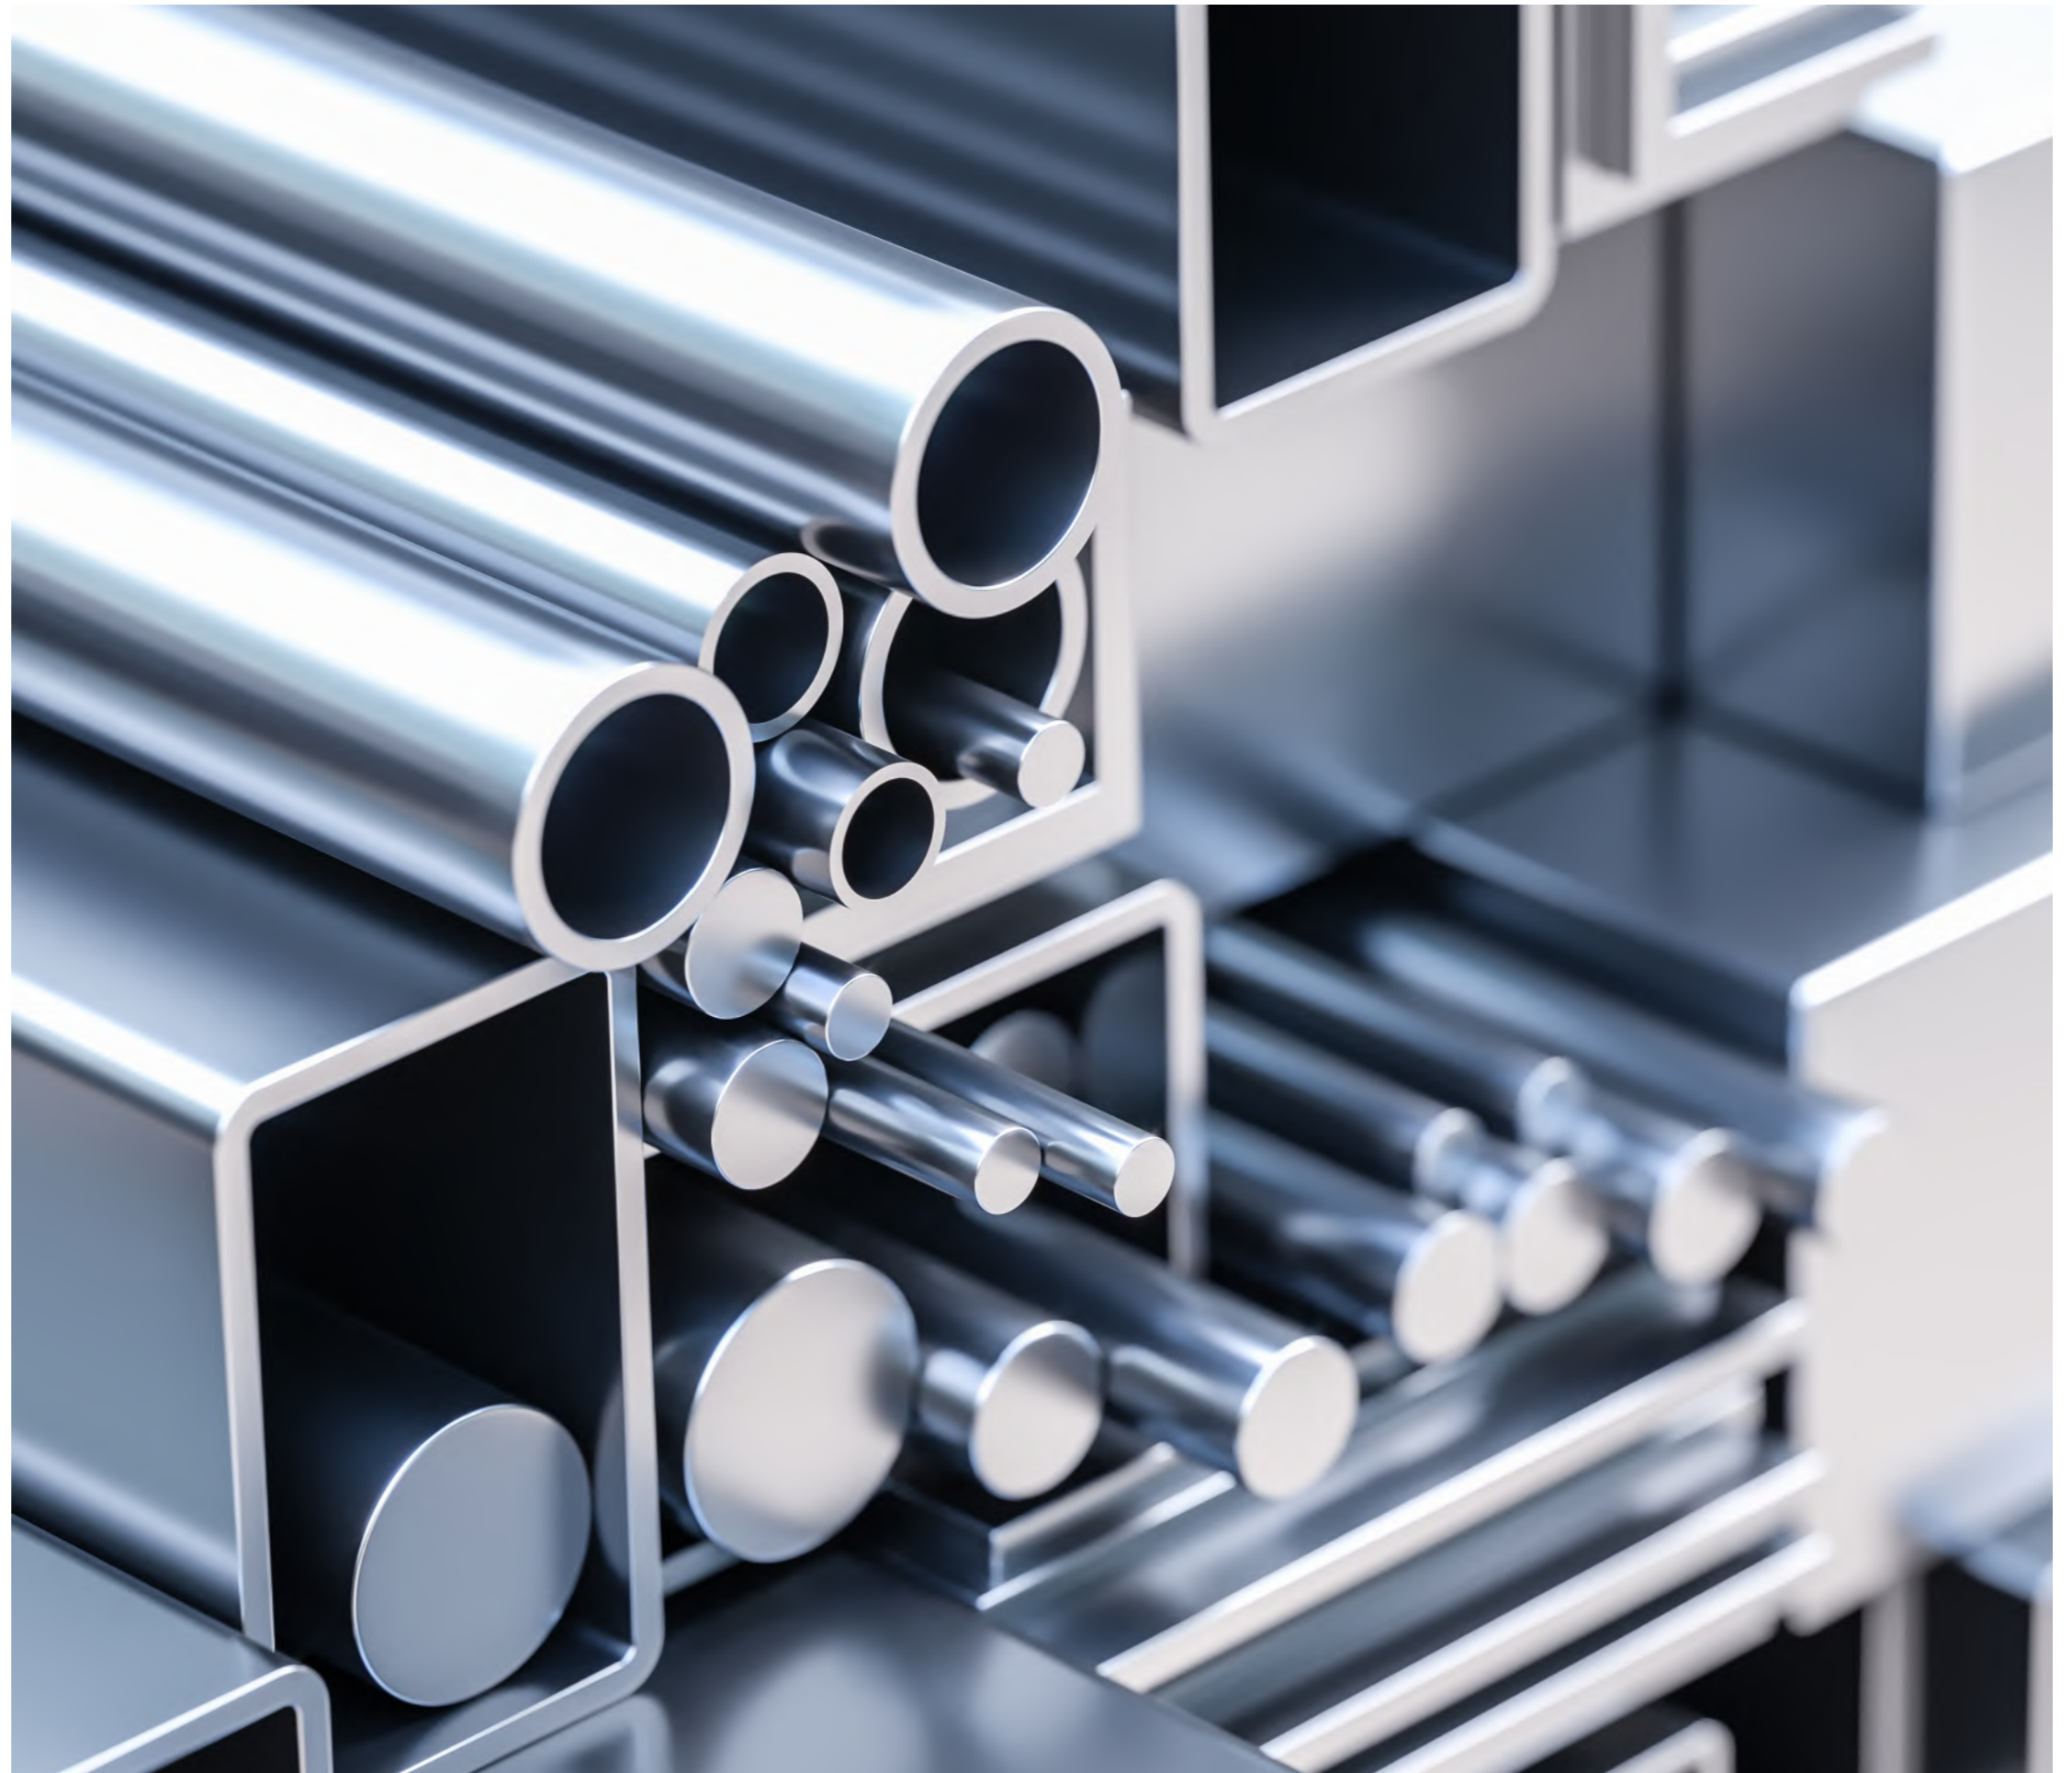

Finishes

Brushed

A textured and understated metal finish. Offers an all-purpose, textured effect that gives the metal a smooth, unidirectional appearance.

Polished

Hand treated metal with a highly-polished mirror finish characterised by a bright, shiny and reflective surface.

Leathers

Tan

A sustainably sourced durable leather. Rich and velvety in colour, robust against cracking and wear, it gets better with time.

Black

A classic and timeless leather finish. Features a soft sheen that accentuates the textured appearance of the leather.

Brown

Easy to clean and condition, protecting against damage. Rich and earthy tones with a textured matte finish, a classic and subtle leather.

Cream

A rich and natural leather that resists fingerprints and scuff marks. Its light structure gives it an exceptionally soft, velvet-like texture.

Cork

Natural Cork

A sustainable and soft finish for yoga equipment, cork offers low density cushioning. The perfect lightweight and durable material.

Custom Options

Custom Options

At Paragon Studio, our goal as a business is to combine the ergonomics of exercise with an aesthetic consideration which sets our gym designs apart from the average workout area. As a team, we have years of experience in creating highly desirable spaces, we go above and beyond creating customisable and bespoke pieces of equipment that are unique to each individual interior and client.

We recently completed our most ambitious project yet for some fantastic London based clients in their basement home gym. We were able to custom stain the wood on their equipment to seamlessly extend their already established interior aesthetics. Everything was chosen to coherently match and complement the design.

This project was completed for a major UK interior design firm who requested we use a mismatched wood for the dumbbell handles and racks.

A bespoke bleached Oak was used for the racking, and for the dumbbell handles our American Walnut was chosen.

As seen here on this project, if required, the end plates can be laser engraved so that weight increments can be clearly displayed in the centre of the surface. Equally, rubber bands can easily be incorporated around the discs of your weights. These bands protect both your weights and flooring from damage during use.

Case Studies

Idea House

The Southern Living Magazine Idea House, with an interior designed by Laura Hodges, opened in August 2023 in Nashville TN.

The house took star position as the Cover Story in the September issue of the magazine, which also featured an in depth interview with country music sensation Thomas Rhett.

Our gym forms part of the home's extensive leisure and well-being offering, bathed in natural light and indulged by huge windows which bring the bucolic exterior in.

The house was opened for tours in Thompson's Station TN through December 17th 2023, and showcases a harmonious blend of modernity, sustainability, and the unmistakable charm of Tennessee.

OWO Penthouse

The OWO Penthouse has been designed by international studio Winch Design, who combine their decades of experience in creating superyacht, private aircraft and residences for ultra-high net worth clients, with a timeless and joyful scheme that champions craftsmanship, artistry and The OWO's historical and cultural significance.

In the design of the five-bedroom lateral penthouse, Winch collaborated with over forty award-winning suppliers to craft and source bespoke pieces of furniture, fabrics, artwork and accessories, creating a residence that feels carefully curated over time. Featuring a private gym and sauna, cinema and games room, staff quarters and expansive terraces with panoramic views, The OWO Penthouse is a truly one-of-a-kind residence.

We were delighted to outfit the gym space with equipment from our range, and the beautiful NoHrd Bike in Oak.

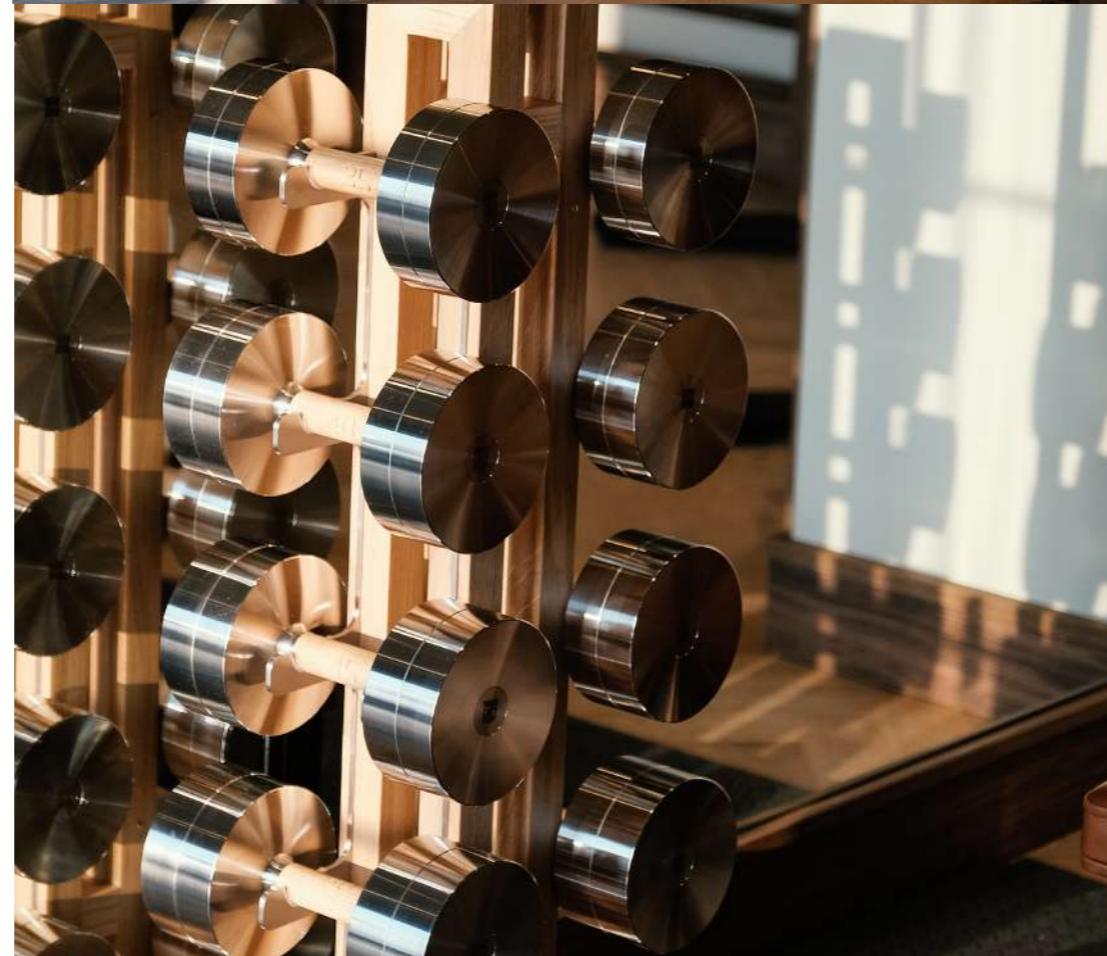

The Manchester Hotel

Working with the hotelier and his design team, Paragon Studio were delighted to be involved in this boutique gym project right in the heart of Lexington's famous Bourbon district.

The gym replicates the incredible finishes incorporated throughout the hotel; built to mirror Kentucky's unbridled enthusiasm, warm Southern light, and full-galoped feeling.

Our team worked on the gym layout design, and created a kit list including Paragon Studio Adjustable gym benches and Boxing equipment with the hotel logo debossed into the leather pads. We also specified Diabolo Dumbbells with the logo laser engraved into the end plates, matching racks and cork yoga equipment.

Lastly, Peloton and Precor were brought in to the project to complete the cardio and strength offering.

The Royal Hotel

This luxury hotel gym in Picton, Ontario was opened to guests in late 2022.

The space forms part of an incredible wellness offering, and features a number of our products.

Seen here is our Folding Wall Bar and Adjustable Bench, which were supplied along with a Wooden Plyo Box and Exercise Ball Holder. We were contracted by the hotel's interior designer to deliver these products towards the end of a long refit.

The products were made in American White Oak in order to match the same material used throughout the interior of the property.

Arabian Ranches, Dubai

Nestled in a quiet corner in the Arabian Ranches neighbourhood, this effortlessly stylish home gym is the latest addition to a family home which has undergone an extensive redevelopment.

The owner was particularly forward thinking in the use of wall space to keep the floor area tidy, and our vertical wall storage options for free weights therefore suited the design perfectly. The level of organisation in this gym is seriously impressive; every item has a hook or a dedicated storage box right down to individual pairs of gym trainers.

Overall this is a stunning space and we are very grateful to this wonderful family for allowing us to play a small part in their amazing home!

Chelsea Home Gym

This beautiful duplex apartment in London was totally refitted by its owner in the Summer of 2023.

Originally 2 separate dwellings, the properties were connected and turned into a single home for a client who frequently travels internationally for business, but has a passion for staying healthy.

Paragon Studio were commissioned to do a complete design of the gym including provision of bespoke equipment in Oak and Steel; and recommendation of supplementary accessories and flooring.

For this ambitious project we created our first triple wall storage unit – with a new module to hold both dumbbells and kettlebells. This has now become a staple within our range of configurable storage options.

A NoHrd Slim Beam, also in Oak, completes the gym with a smart and compact cable training facility.

Tuscany Villa

This Tuscan Villa is owned by a family who are enthusiastic about their training and have gyms in their properties around the world. The project we completed in late 2023 with Pippa Paton Design.

The standout feature of this converted garage gym is the set of enormous glass doors at the front; letting in the light and allowing fresh air to flood into the gym during the summer months when they are open.

Our equipment was specified in Oak and Steel, with heritage brown and tan leathers being chosen to meet the design brief.

Partnerships

Millimetres 2 Mountains Foundation

We are thrilled to announce that we will be working with the Millimetres 2 Mountains Foundation as our nominated charity for 2025.

Millimetres 2 Mountains creates positive change for individuals who have experienced life-changing trauma through the healing powers of the great outdoors. Founded by Ed and Lois Jackson, the charity supports its community with opportunities for global trips and challenges, life coaching, physio, career grants, UK walks, wellness retreats and more.

Showroom Locations

We're thrilled to announce our partnership with Linley London, bringing Paragon Studio's distinctive, award-winning designs to the streets of Belgravia, London.

Now, you can explore our collection—including the Diabolo Dumbbells and Deluxe Leather Boxing Gloves—at the prestigious Linley Belgravia showroom.

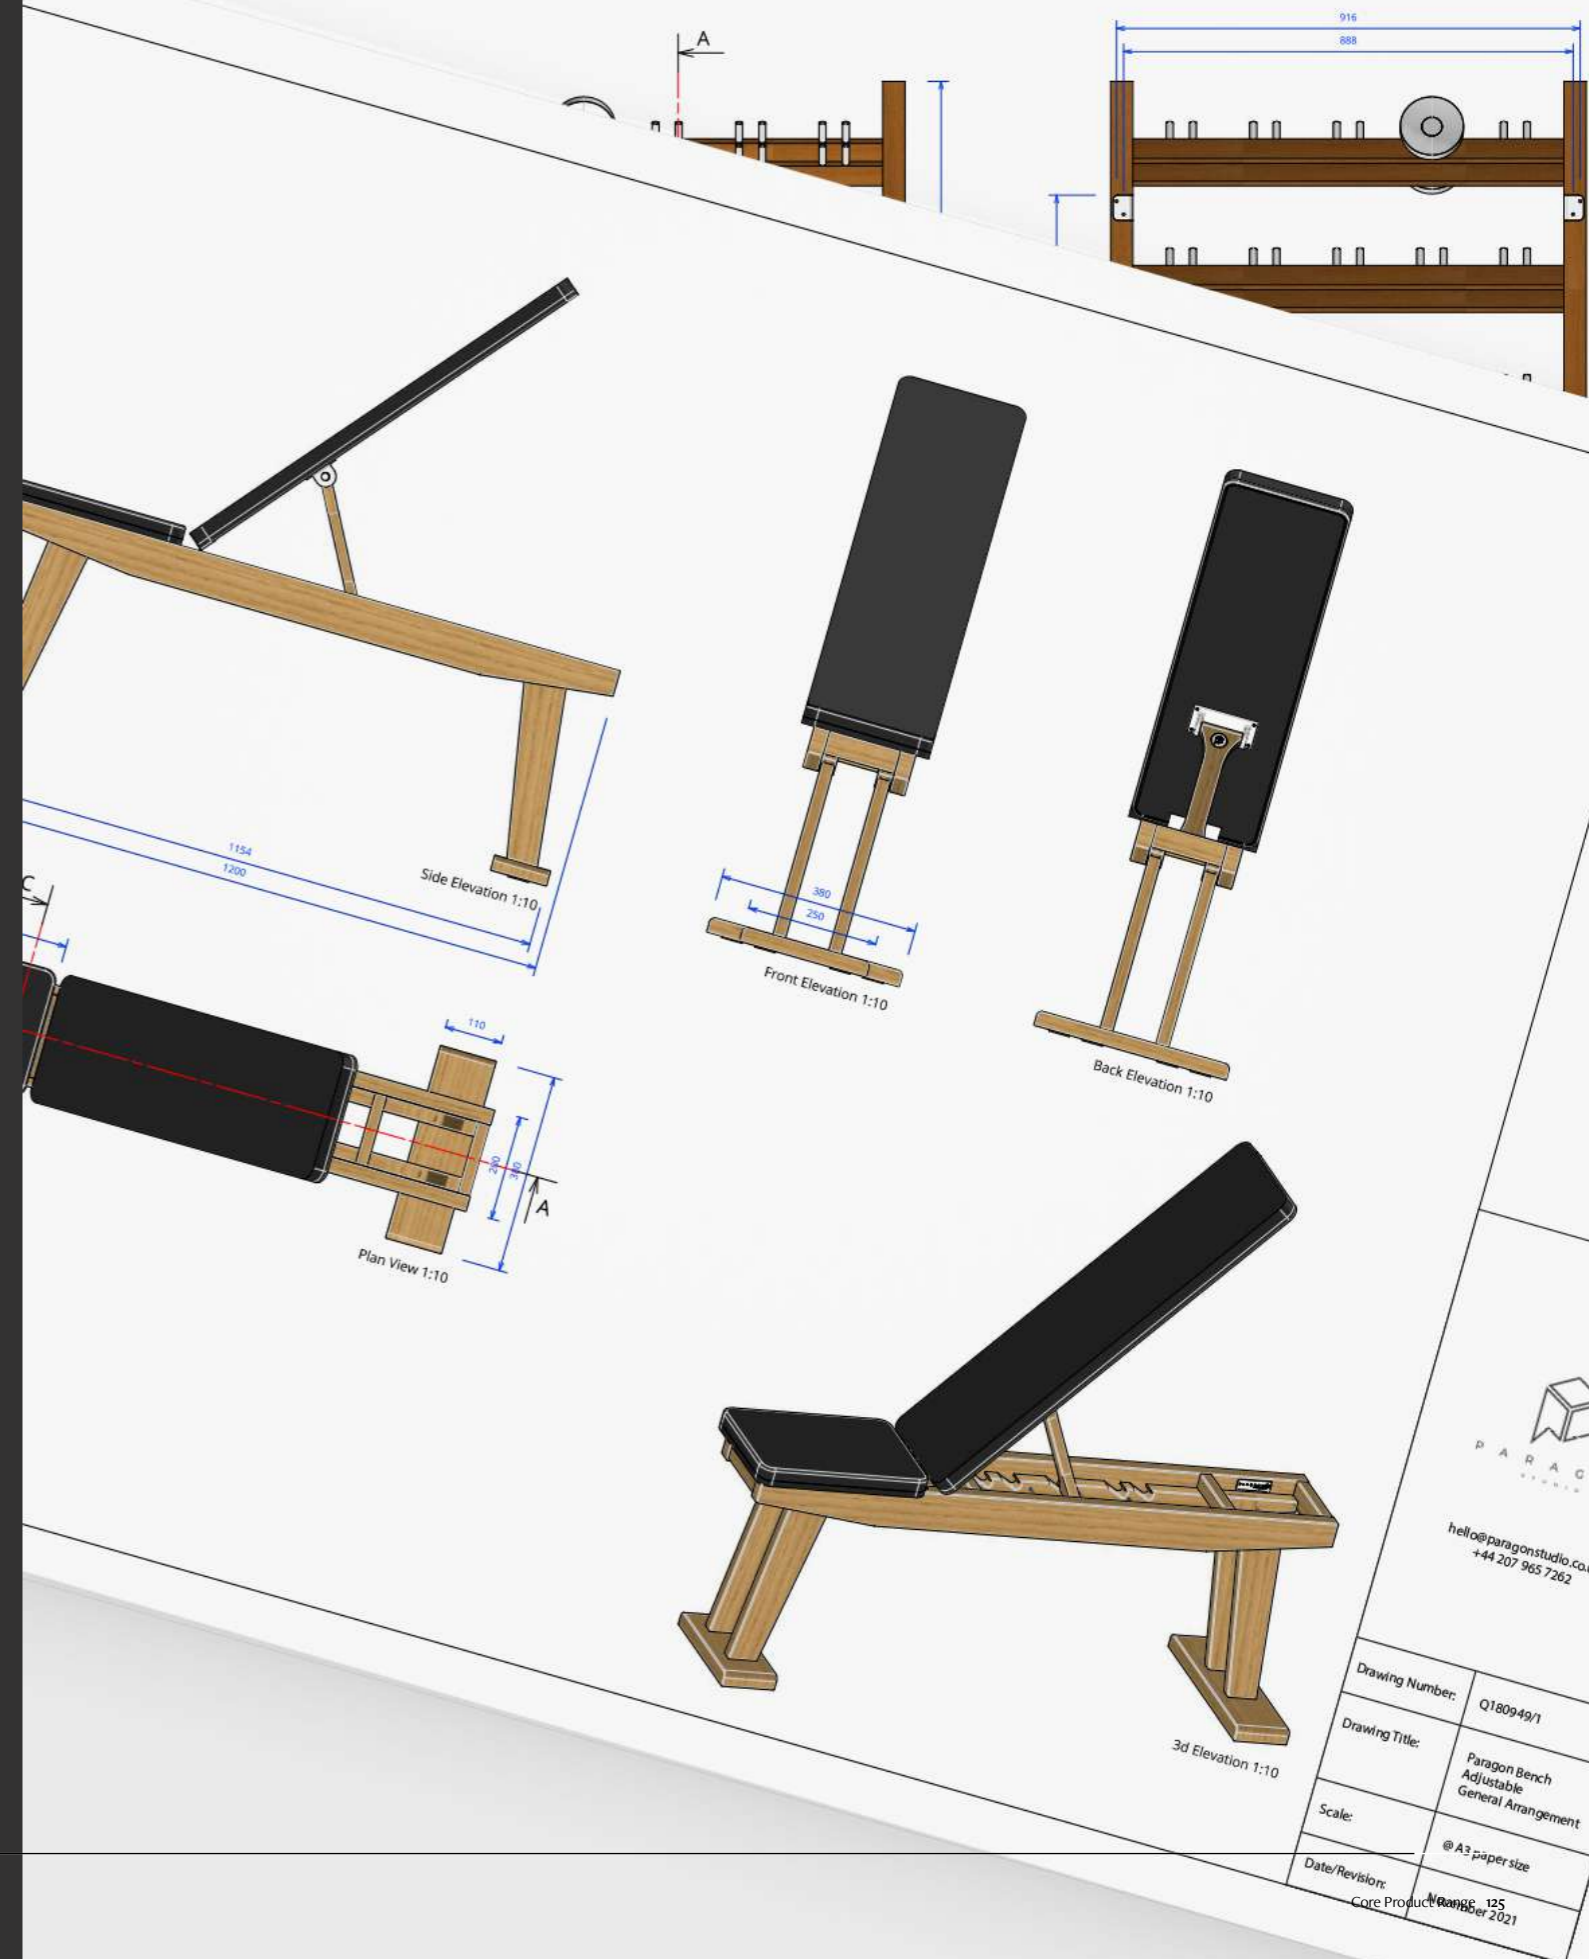

As well as this partnership, we also have showrooms to visit globally, including:

- HQ - Bath, UK
- Glancy Fawcett in Old Trafford - Manchester, UK
- National Marine in Fort Lauderdale - Florida, USA
- Finasi Interiors - Dubai, UAE

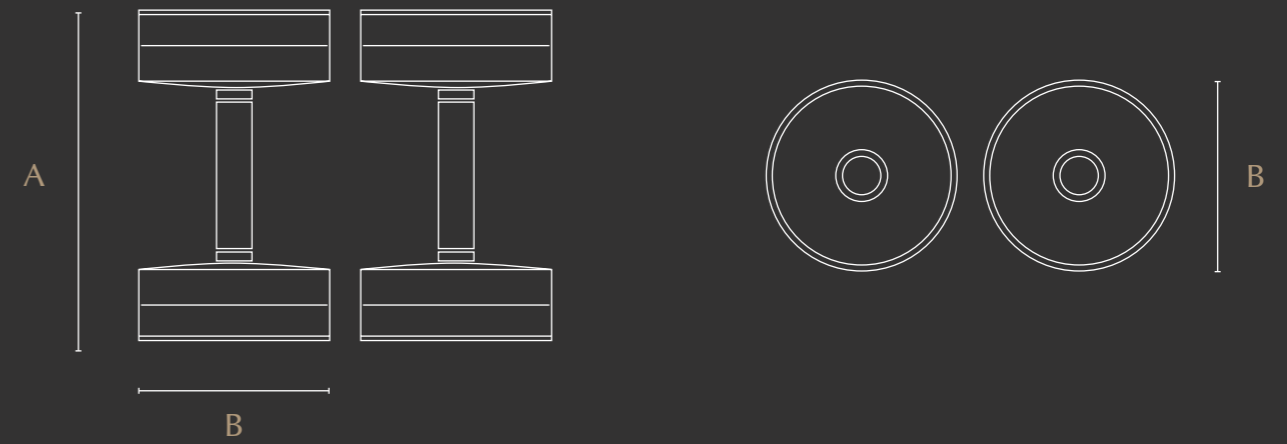

Equipment also on display with:

- VUORI Regent Street - London, UK
- VUORI Kings Road - London, UK

If you are an architect or profesional interior designer, then we would love to invite you to our Designers Area on our website, where you will find all of our 2D and 3D models for use in your schemes.

Filetypes available include DWG, DXF, STEP, 3DS and SKP
Please contact us for information on how to access and to request any custom drawings you may not find online.
